What's next?

1. The first step is to pick a domain name. If you don't have one in mind already here are some tips:
 - a. If the name of the church/organization/business is long it may be good to shorten the domain name. Something that is easy to remember and not too many characters. The name should not be a total departure from your physical name.
2. Look around at some other websites in your business category to get an idea about the layout flow and topics/pages.
3. Work on bios for all staff that will be on the site.
4. Start writing the front page welcome message
5. Gather together vision statement, description of all ministries, products and/or services
6. Gather all video and pictures and sermons you wish to post on your site.
